## Kay Lake

N 49 07 073 W 093 45 325

Kay Lake is our closest outpost, just ten minutes from our base. We have two locations on this lake. The first location is found on a secluded island. The second is located on a high rock point with a spectacular view overlooking the lake. Kay Lake is approximately four miles long and has some of the finest Smallmouth Bass, Muskie and Lake Trout fishing. It is well known for its excellent average-size Smallmouth Bass with many caught in the three- to five-pound range. We are the only outfitter on the lake. Numbers speak for themselves, with many groups reporting over a 100-plus fish per day. Kay Lake has two short portage lakes: Derby connected to Kay by a small river and Anstey which offers you a chance to go for a short 150-yard hike where you'll find a boat and motor on the other side. With all of the areas you have to fish and explore, you will always find a secluded spot with lots of fish. For a break from the Bass and Muskie fishing, why not do a day fly-in for Walleye? We can arrange for you to be flown into Arrow Lake for the day where you can catch Walleye from the time you depart the plane until you reboard in the late afternoon. If this is something you are interested in – be sure to ask us for pricing on this package.
